Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claim 13 rejected under 35 U.S.C. 103(a) as being unpatentable over Sakai et al. (U.S. 6,222,603).

Sakai discloses a method of manufacturing a liquid crystal display device having both a main seal pattern and a dummy seal pattern. Note in figure 6, the main seal pattern 6 and dummy seal pattern 11.

Sakai does not disclose the device used to form the main seal pattern and dummy seal pattern. However, it would have been obvious to one of ordinary skill in the art at the time of invention to form the two seal patterns disclosed by Sakai using a device having a first seal pattern printer and a second seal pattern printer because of the increase in manufacturing efficiency. Being able to form both seal patterns simultaneously instead of forming one after the other reduces the number of manufacturing steps, making the process more efficient. Examiner notes that the first

printing method and second printing method can be construed as being identical methods.

Allowable Subject Matter

Claims 14-17 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art did not teach or suggest a seal pattern forming device having a first seal pattern printer and second seal pattern printer and further comprising the specific structural elements recited in claims 14-17.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Chung whose telephone number is (571) 272-2288. The examiner can normally be reached on Monday-Friday from 8:30 am to 5:00 pm.
